Dr. Jane Henney  
Commissioner, U.S. FDA  
5600 Fishers Lane, Rm. H-71  
Rockville, MD 20857

Dear Commissioner Henney,

~~4231 00 MAY 28, P-127~~  
I'm very disturbed to learn  
that massive amounts of antibiotics are  
used in cattle and poultry feed for no  
other reason than to enhance weight  
gain and prevent illness. If doctors  
prescribed antibiotics for these reasons,  
they'd probably lose their license.

Health threats from antibiotic-  
resistant bacteria continue to mount.  
The problems are approaching a crisis stage.

The FDA must ban the addition of  
human antibiotics in animal feeds!

And, they must do it now!!

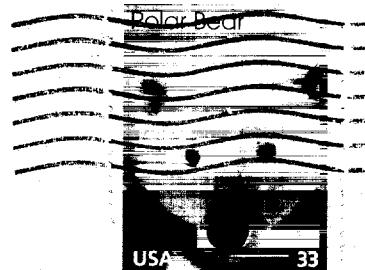

Sincerely,

James L. Boone
